

CYCLING

# ABOUT US

SIXS' history began in 2009 in Italy, in Bagnara di Romagna (province of Ravenna) to be more precise. An overwhelming love for sports and an in-depth knowledge of textile technologies combined together to give rise to the company. The result is a patented, extremely innovative fabric sold on the world market of sports apparel, but that is made only in Italy. A fabric that optimally interacts with the human body. It is not a barrier, but rather a "second skin" able to ensure proper insulation and manage sweat wicking.

**"Innovative Solutions for Sports" is what the acronym and name SIXS stands for, so it is easy to guess how much innovation and research into the development of this product are deeply rooted.**

Everything began with six simple products and no expensive advertising campaigns, but rather only the certainty of the quality and effectiveness of this Italian-made excellence.

In just two years SIXS became a brand distributed in over 1,000 points of sale throughout Italy simply by offering field tests to athletes and retailers.

Growth was non-stop, and the number of items in the catalog rose to over 100. No longer is just technical underwear offered. There are also sports outerwear (Activewear) lines, impact protection (Pro Tech), as well as a Kids line and a full range of accessories. All of this is based on the use of the patented fabric that makes SIXS items incomparable in terms of quality and effectiveness.

# YOUR SECOND SKIN

THE SECRET LIES IN THE FABRIC

# WHAT MAKES US UNIQUE?

Those who still haven't had the pleasure of personally trying on a SIXS garment often ask themselves: "What is so special about these products?" The answer is very simple: it is called **Original Carbon Underwear®** and it is the patented fabric that makes our garments unique.

The result of years of research, the precise blend of technical fibers and distinctive weaving stitch ideally come together to create a fabric designed to help athletes attain a level of comfort never before experienced during their sports activities.

The configuration of Original Carbon Underwear® allows sweat to be truly taken away from the skin to the outside due to low density zones properly alternating with light pressure zones. This peculiarity ensures the athlete **correct thermal insulation** and **optimum breathability under all conditions**.

The structure of the fabric just described can be achieved only by combining the weave stitch with technical fibers, and this is why SIXS products are hard to copy.

The low density zones are created by using **carbon fiber** that not only is extremely hard-wearing and ultralight, but also boasts an enormous thermal insulation capacity (it is, in fact, commonly used in spacesuits). Its fineness in the form of textile fiber, which makes it practically invisible to the human eye, creates those micro cavities that channel sweat to the outside so the skin is left dry.

The polypropylene, polyamide fiber and polyurethane fiber, complete the blend and add essential characteristics such as: thermal insulation, water-repellency, bending and wear resistance, stretch and non-deformability.

## 100% MADE IN ITALY

We are proud to boast **100% Italian design and production** that represent a guarantee of a **high quality product**. This also allows us to constantly make progress as we can quickly adapt to the technical evolution of the market.

### FABRIC SECTION

#### KEY:

- Low density zones
- Light pressure zones

- Movement
- Skin

- Moisture leakage
- Fabric

# CONSTANT THERMAL INSULATION

Thanks to its blend of textile fibers, the Carbon Underwear® fabric is just like a breathable barrier that keeps the body temperature constant under all weather conditions.

# MAXIMUM BREATHABILITY

The patented SIXS weave stitch and the polypropylene found in our fabric create a perfect combination: a lower liquid absorption rate and a greater water vapor permeability than other textile fibers.

## HEAT LOSS CAPACITY

### HEAT TRANSFER RATES

## BATTERIOSTATIC

Because it respects the skin and protects it from bacteria and pollutant dusts: the Carbon Underwear® fabric has properties that eliminate the risk of annoying allergies, reduce the proliferation of bacteria and the procreation of bad smells.

## ANTISTATIC

Because of its conductivity, the fiber absorbs and disperses electric charges accumulated from the environment or during physical exercise.

# LIGHT AS A FEATHER

The Carbon Underwear® fabric has the lowest specific weight of all textile fibers on the market.

# FAST DRYING

The fabric does not absorb sweat, but rather carries it to the outside so that the skin is left dry. The garments dry quickly after being washed.

**Carbon Underwear®**  
(four-season fabric)  
breathability <3 m<sup>2</sup>Pa/W

**Thermo**  
Carbon Underwear®  
breathability <3,5 m<sup>2</sup>Pa/W

DENSER  
**45%**

Between 2009 and 2014 Carbon Underwear® was the only fabric that SIXS used to make the Underwear line as it proved to be ideal for both summer and winter. This is why we call it "4 Seasons".

Our R&D laboratories were able to start from this excellent starting point to create another two fabrics that are able to exalt breathability in the one case, and thermal insulation in the other.

They are **SuperLight Carbon Underwear®** and **Thermo Carbon Underwear®**. The first was designed to create the Underwear Light line specific for the summer and warm climates, while the other forms the Underwear Warm line, the perfect ally for winter cold.

### EXTRA PLUMA BARRIER

Fabric consisting of two ultrathin layers to get an incredibly lightweight membrane with a much lower specific weight, but that is breathable and protects against severe weather conditions.

- waterproof: >8000 mm water column
- breathability <7 m<sup>2</sup>Pa/W

### ATOM ACTIVEWEAR

Fabric with a 3D honeycomb structure, 100% polypropylene, for maximum breathability and sweat wicking.

### BOUNCE BARRIER

Windproof and waterproof membrane that is also resistant to stretching and tearing.

- composition: 45% PES, 55% PU, BREATHABLE
- waterproof: 5,000 mm water column

### HONEYCOMB

Lightweight, breathable, windproof and water repellent, with an organic DWR (Durable Water Repellent) non-fluorine treatment. The interior has a honeycomb structure to collect moisture and convey it towards the exterior

- waterproof: 8,000 mm water column

### CARBON MERINOS WOOL

The polypropylene layer in contact with the skin prevents accumulation of perspiration, providing unmatched comfort. The merino wool is properly placed in the outer layer to act as a barrier.

- breathability <6 m<sup>2</sup>Pa/W

### POLARTECH ACTIVEWEAR

Bonded winter fabric: on the inside, the polypropylene carries moisture to the outside and keeps the body warm and dry. The external polyester coating provides waterproofing and airtightness.

- waterproof >10,000 mm water column
- airtightness <1 mm/sec
- breathability: <16 m<sup>2</sup>Pa/W

### TD SHIELD

Windproof and water-repellent polyester membrane.

- waterproof: >10,000 mm water column
- breathability <18 m<sup>2</sup>Pa/W

# TECHNOLOGIES

## COMPRESSION TECHNOLOGY

Graduated compression to stimulate oxygenation and blood circulation, which help recovery and boost power

## INTELLIGENT SAFE PROTECTION

Thanks to the special impact-sensitive protectors, the product is soft and pliant, so it perfectly adapts to the body's anatomy. The protectors stiffen at the time of impact and absorb the force of impact

## HYDROPHOBIC WEAVE

It carries moisture to the outside so it can evaporate. The skin is always dry and thermal insulation is constant

## PLUMA INNOVATION

Ultra-light product

## SPF 50

Sun Protection SPF 50+

## MERINO WOOL

Product containing merino wool

## BRAINY POSITION

Mix of breathable and windproof fabrics positioned at optimal areas to ensure product functionality

## CUSHION

Cushioning pads

## WATERPROOF PRIME

Waterproof and breathable product

## HIGH VISIBILITY

Reflecting inserts for maximum visibility

## GRID-TECH

Very high level of breathability owing to the large mesh structure

## AIR SHIELD

Breathable windproof protection

## ANTIBACTERIAL FIBER

Polypropylene fiber prevents foul odors and annoying irritations due to build-up of perspiration and chafing from forming

## ANTISTATIC SYSTEM

The carbon yarn isolates the static electricity caused by the rubbing of fabrics

## SEAMLESS TECHNOLOGY

Less seams for an absolute comfort

## 3D TECHNOLOGY

3D honeycomb structure

# COMFORTABLE SITTING

## ENDURANCE PAD

Butt-patch designed for long distances (over 8 hours of riding).

The triple-density construction guarantees lasting comfort throughout the session: a 4 mm foam base, with 3 additional mm of material in the support zone, and 8 mm in the ischial zone.

SKYVE technology keeps the pad's thickness to a minimum, creating a perfect ergonomic contour to prevent chafing while pedaling. The Zig Zag Carbon fabric has extraordinary insulation and antistatic properties, which make it quick-drying and breathable.

## TWIN PADDED TECHNOLOGY

Revolutionary butt-patch technology for long distances and for off-road/gravel. The pad is inserted into the shorts without any overlapping of fabric, so that is in direct contact with the seat. This method reduces chafing.

The butt-patch is composed of two foams designed to work synergistically: the outside base, with a density of  $65 \text{ kg/m}^3$  and a thickness of 3 mm, ensures optimal freedom of movement and incredible elasticity, while preventing chafing caused by fabric rubbing against the seat. The inside foam has a density of  $85 \text{ kg/m}^3$  and a thickness of 12 mm, perforated to guarantee optimal breathability and moisture wicking.

## RACE PAD

Butt-patch designed for medium distances (over 6 hours of riding). Double-density construction ensures exceptional comfort while eliminating energy dispersion: a 4 mm foam base, with 8 additional mm of foam in the support zone, with a density of  $110 \text{ kg/m}^3$  for uniform protection at all of the body's points of contact. The antibacterial fabric with its characteristic interlocking twisted-mesh structure provides natural micro-ventilation, allowing for quick drying and perfect thermal insulation.

## AGILE PAD

Medium-density butt-patch that is comfortable and versatile for all uses. It is designed for short to medium distances (up to 3h of non-stop pedaling). It boasts a thin design to take up minimum space, is very flexible, and it has a double padding layer (4 mm thick in the outermost part, while the center zone arrives at 8 mm) to guarantee adequate shock absorption for road cycling and outdoor activities.

# TEMPERATURE AND INTENSITY

The two main factors that determine the choice of one product over another are the level of physical activity (such as intensity of effort) and the temperature of the environment in which the product will be used.

# UNDER WEAR LIGHT

## INCREDIBLY LIGHTWEIGHT

The products of the SIXS Underwear Light line are suitable for all sports undertaken in **high temperature conditions**.

**Worn in direct contact with the skin and underneath normal sports clothing**, these garments keep the skin always dry because they eliminate moisture and the consequent feeling of dampness.

Now thanks to the Underwear Light line underwear will no longer be an optional, even on muggy days. **By avoiding sudden chills** (due to sweat or damp fabric in contact with the skin), **comfort will always be guaranteed while considerably reducing muscle injuries**.

## SUPERLIGHT CARBON UNDERWEAR®

New fabric with a lighter weave coming from experience gained in extreme sports competitions (such as the Dakar, for example), with weather conditions that push the body to temperatures on the borderline of human tolerance.

Derived from the patented fabric Carbon Underwear, carefully altered to give way to incredibly lightweight products (**-36% in weight!**)! **Ultimate breathability** to guarantee comfort even at high temperatures.

Philippe Gilbert - Paris-Roubaix 2019  
Credits: © Getty Images

## MESH SLEEVELESS JERSEY

For those who need minimal, fresh and lightweight clothing.

GRID-TECH technology: prevent annoying chafing and create cushions of fresh air that reduce the sensation of the skin "suffocating" under the garment.

The polyamide fiber with its extremely low specific weight is able to absorb the skin's moisture to leave it fresh and dry.

# UNDERWEAR

**SUITABLE  
FOR ALL  
SPORTS,  
ALL YEAR  
ROUND**

## THE IRREPLACEABLES

The products in the SIXS Underwear line are suitable for all sports, all year round. Perfect in all circumstances involving physical activity, all of the garments in this range are meant to be worn in direct contact with the skin, underneath the usual sports clothing.

Owing to their incredible insulation and breathability characteristics, SIXS garments always keep the skin dry, because they eliminate

moisture and the consequent feeling of dampness. This is why Underwear is no longer considered an *optional* during sports activities. **By avoiding sudden chills** (due to perspiration or damp fabric in contact with the skin), **comfort will always be guaranteed while** considerably reducing **muscle injuries**.

## 4 SEASONS CARBON UNDERWEAR JERSEYS

Essential products suitable for all conditions, (both indoors and outdoors). Skin is always dry and fresh during competition and when training, for any sport. The lightest and most breathable polypropylene fiber on the market, combined with a real carbon yarn, which provides heat transmission and possesses antistatic properties to protect the body from the electric charge caused by rubbing multiple synthetic fabrics against each other (condition typical of sports clothing).

Tight fit for wearing underneath outerwear.

## WIND PROTECTION ACCORDING TO SIXS

Acting on the need to provide increased protection from air in the front zone of the body, we have inserted the exclusive **AIR SHIELD** system into several products. It is an extremely effective windproof protection without

membrane, to maintain a very high degree of sweat wicking, in this way preventing the classic "greenhouse effect".

## SHORT SLEEVES WINDSHELL JERSEYS

Short sleeve jerseys with windproof WindShell Carbon Underwear protection, ideal for outdoor sports.

SIXS Air Shield technology protects the torso from cold air in the front. A thin layer of breathable windproof fiber creates a micro air cushion that protects the body without causing the classic "greenhouse effect" that increases perspiration.

The rest of the product is in SIXS Carbon Underwear fabric, breathable and thermoregulating in any weather condition.

# UNDERWEAR WARM

## CONTROL WINTER

The garments in the SIXS Underwear Warm line are suitable for all sports undertaken in **harsh temperature conditions**.

**Worn in direct contact with the skin and underneath normal protective sports clothing**, these garments keep the body temperature properly regulated and the skin always dry, because they eliminate moisture and the consequent feeling of dampness.

Why wear 3 or 4 layers when you can feel at the right temperature by just using the Underwear Warm line garments with your outerwear?

Changes in temperature will no longer be a problem either. **By avoiding sudden chills** (due to perspiration or damp fabric in contact with the skin), **comfort will always be guaranteed while considerably reducing muscle injuries**.

## THERMO CARBON UNDERWEAR®

Derived from the patented Carbon Underwear®, this new fabric, with a **45% denser** weave, has been carefully altered to keep **insulation constant** without limiting the **perspiration** of the body in extreme cold conditions.

## WINTER THERMO CARBON UNDERWEAR JERSEYS

Designed for low temperatures (below 5°C), they allow the athlete not to waste precious energy to warm the body.

In these conditions, it is essential to wear an "enhanced" product that manages the body temperature by conveying any sweat to the exterior without absorbing it.

Total protection is provided by Thermo Carbon Underwear fabric, 45% denser than Carbon Underwear (material with which the 4 Seasons Underwear line is made).

# MERINOS WOOL

## THE SECRET FORMULA

After the huge success of the two models of socks (LUXURY MERINOS and ARROW MERINOS) whose composition included merinos wool, we decided to expand the range of products by creating a special line: MERINOS WOOL.

Specific winter line with wool thermal regulation properties, which are superior to any other natural fiber and therefore acts in an excellent way as a barrier against the cold!

## POSITION OF MATERIALS

We wanted the comfort of the product when worn to be the same as that of the other products making up the SIXS catalog.

Finally, carbon helps regulate heat, improves body microcirculation, and is bactericidal (fights bad odors) and antistatic.

For this reason we decided to put polypropylene inside, in direct contact with the skin, and keep the merinos wool (known to be a bit rougher and bristlier than other yarns) outside.

The wool has heat regulation properties that are superior to any other natural fiber, and it acts as a barrier against cold.

Polypropylene, on the other hand, is a hydrophobic yarn, meaning it does not absorb liquids and optimally manages perspiration.

DON'T  
FEAR  
THE  
WINTER!

## CARBON MERINOS WOOL BASELAYERS

Extremely versatile, sober look, comfortable to wear. Ideal for use as baselayer or an intermediate layer at low temperatures.

Although the weight of the fabric is decidedly low (only 164g/m<sup>2</sup>), merino wool acts as a natural barrier against the cold.

Placing it outside the tissue, we have eliminated the classic problem of itching; the layer of polypropylene in contact with the skin avoids the accumulation of sweat, giving unparalleled comfort.

# ACTIVE WEAR

## SIXS TOTAL LOOK

The Activewear line brings the technology and benefits of our Underwear to outerwear products as well thanks to the innovative **SIXS Carbon Activewear** fabric. The formulation is the same, but the weight is specifically designed to be worn as an outer garment. The Activewear garments can be

combined with the Underwear line, enhancing the outstanding qualities of SIXS textile technology.

## ACTIVEWEAR BIKE

Activewear collection dedicated to cycling, revolutionized and expanded with new products and colors. Bib Tights and Bike Jerseys made of Carbon Activewear are ideal to be worn in direct contact with skin or over a garment of the Underwear line. Complete your style. Create your total SIXS look.

## THE MESH OF THE FUTURE

Cycling jersey for the most torrid summer: whether you are making a maximum effort during a competition, whether you are walking on a sunny summer day, this shirt will be your faithful ally.

A lightweight frontal mesh allows to expel all the excess heat.

The Light Carbon Activewear panel on the back with carbon filament thermoregulates the body temperature and keeps the skin dry and fresh in the areas most exposed to sunlight.

## SHORT LEG BIB TIGHT

The 2020 model of the CHROMO BIB represents a significant evolution compared to last year's model, our best-selling shorts ever. There is a new 3D textile stitch on the leg and in the area above the groin, which increases its stability but without reducing its elasticity, wrapping the body perfectly without pressure points. The properties of the Carbon Activewear weft combined with the comfort of an anatomical seamless product, without seams on the sides and back, create a one-of-a-kind bib. Always fresh and dry skin, for maximum comfort in all conditions. Configurable with "Race Pad" or with "Off-Road" seat pad.

## MID-SEASON BIKE JERSEY

The HIVE Jersey is a short-sleeve cycling jersey for mid-range temperatures, created using a revolutionary technology. The 3D honeycomb structure, made from 100% polypropylene, creates an air cushion that insulates and provides thermoregulation for the body, allowing for maximum breathability and sweat wicking. The rear, which is contoured for perfect wearability, retains the classic Carbon Activewear construction. Pair this garment with MANI or MANI STORM sleeves on cooler days and bring along a GHOST/WARD vest or jacket for greater protection when going downhill or in case of bad weather.

## WINDSHELL BIKE JERSEY

The WINDSHELL jersey is a long sleeve cycling jersey ideal for the fall and spring, when the temperatures still require protection against the cold air. Made from breathable polypropylene enhanced with 3D-insert technology in the areas most prone to sweating, so as to promote the expulsion of moisture and body heat. On the front is a membrane to shield against the wind and repel water, to protect you against cold gusts of wind. Reflective insert to increase visibility and a practical pocket with three compartments.

## SHORT-SLEEVE WINDSHELL BIKE JERSEY

Cycling jersey with thin windproof membrane on the frontal areas - ideal on spring days when the weather is still uncertain.

Protects from frontal wind without overheating the body, thanks to the lightweight fabric and the rear area in Carbon Activewear.

The inner layer (honeycomb) collects moisture and transfers it to the hydrophilic membrane, which allows you to expel sweat without passing water and wind from the outside.

## SOFTSHELL JACKET

The TWISTER JACKET is our best-performing jacket in conditions of extreme cold. The membrane used is a softshell, bonded and coated to be completely waterproof (10,000 mm water column).

The interior is polypropylene for perfect breathability and thermal insulation. Improved with respect to the previous version, it is now made membrane on the entirety of its construction, allowing for better insulation from the cold on days when temperatures are harsher. The softshell membrane is designed to work effectively in any sort of weather conditions.

## WATER REPELLENT BIB TIGHT

This cycling bib tight is the best garment for the chilliest days out on a bike, when the temperatures begin to fall. The fabric used is unbelievably light, while nonetheless retaining its incredible properties of water resistance, efficient insulation and high breathability, for unparalleled comfort. The low weight and minimal volume of the STORM BIBTIGHT make it pleasant to wear when riding in the sun or uphill as well, even while it offers protection against unpleasant fall and spring weather.

"Endurance Pad" seat pad: designed for long distances (over 8 hours of riding). The triple-density construction guarantees lasting comfort throughout the session.

Available with men's or women's seat pad.

## COMFORT AND PROTECTION HAVE A NEW NAME

The introduction of SAS-TEC protectors to the range of SIXS products brilliantly satisfies the need for **safety and freedom of movement in all sports.**

Practical housings hold the protective elements, which are perfectly positioned at the crucial points of the body. The **protectors** are in turn soft and comfortable,

but instantly **become stiff and protective when they are needed.**

These features, along with the standard thermoregulation and breathability of SIXS products, make the garments in the Pro Tech line an excellent solution for anyone looking for a single product offering both comfort and protection.

## TECHNOLOGICAL INNOVATIONS

Materials unique on the protection scene, which combine chemistry and advanced engineering to obtain a **top performing impact absorption system.**

In normal conditions, the molecules flow freely to allow the material to remain soft and pliant, but at the moment of impact they lock together to absorb the shock and abate the force transmitted. Afterwards the molecules immediately return to their pliant state.

The abdominal band with Velcro closure keeps the back protective armor firmly in place on the athlete's back.

The elastic band with Velcro closure on the elbow makes sure that the protector always stays stable and properly positioned, even if subjected to intense stresses.

Chest armor is easy to adjust on the jersey with the aid of the Velcro fastening, so its position can be adjusted according to other protectors.

The pockets are painstakingly sewn around the protectors to secure them in the right position.

## THE CHOICE IS UP TO YOU

Pro Tech line products can be purchased "bare" (meaning without protectors) or in the "KIT" version (complete with protectors). The KIT lets the athlete purchase just one bundle of protective elements and use them inside other products in the Pro Tech range.

## MESH SLEEVELESS JERSEY WITH SPINAL PROTECTION

Mesh sleeveless jersey, ready for insertion of spinal protection. The customer can choose between the CE approved back protective armor level 1 (PRO BACK LIGHT by SAS-TEC) or level 2 (PRO BACK CE2 by SAS-TEC). Perfect for warm days when you want to have just the bare minimum, but you don't want to go without protection. Thanks to GRID-TECH technology, the mesh lies between the skin and the clothing on top, to prevent annoying chafing and create cushions of fresh air that reduce the sensation of the skin "suffocating" under the garment. The polyamide fiber with its extremely low specific weight is able to absorb the skin's moisture to leave it fresh and dry. The back of the sleeveless jersey is in "mesh", so that the rear pocket, where the back protective armor will be inserted, can be fastened.

## REINFORCED CARBON UNDERWEAR PROTECTIVE JERSEY

Jerseys with full-length zipper, made of Reinforced Carbon Underwear material: the Carbon Underwear fabric has been reinforced to guarantee the same breathability and insulating features as our Underwear, but with increased density to bear the weight of the protectors and keep them firmly in place. Protections can be integrated as needed (products have the predisposition).

The back protective armor is fastened to the sleeveless jersey with a back pocket stitched at the top, but raised off of the center zone of the back to offer enhanced ventilation, and an abdominal band with Velcro closure that holds it in position. The ventilated chest protective armor (CE approved) is easy to adjust and remove using the Velcro closure. Product compatible with any type of Neck Brace.

## FOR TOMORROW'S CHAMPIONS!

Here is enhanced comfort and safety for children up to the age of 12, too. Whether they are just starting out on a stupendous sports career or are taking up weekend challenges with their friends, the patented Carbon Underwear® fabric will help them maintain the right body insulation and temperature. This means fewer colds, sore throats and flu. In short, it is a big help when it comes to their health!

---

## FROM AGE 4 AND UP

We are the first to offer children the same solutions that win over athletes around the world. Our products come in the sizes of 4 to 12 years of age.

Since it is their growth period, the fantastic stretch of the fabric ensures a longer lifetime than would be expected. Indeed, it will not be necessary to change the product every year, much to the joy of the parents!

**WE FULFIL  
THE DREAMS OF  
LITTLE ATHLETES**

## 4 SEASONS KIDS CARBON UNDERWEAR JERSEYS

Products for children from 4 to 12 years of age: multi-sport garment, ideal on all occasions.

Skin that is always dry and fresh during competition and training in any sport.

The lightest and most breathable polypropylene fiber on the market combined with a real carbon yarn that provides heat transmission and antistatic properties that protect the body from the electric charge caused by rubbing multiple synthetic fabrics against each other (condition typical of sports clothing).

Tight fit for wearing underneath outerwear.

## WINTER SHOE COVERS

Shoe covers made with Windtex: an ultralight waterproof and windproof membrane that is a combination of softness, stretch and abrasion resistance.

The product is naturally breathable and insulating. Plus, it offers a high degree of comfort at low temperatures. Zipper fastening on the back so it is easier to put on; reinforcement tab on the heel providing greater resistance.

## SLEEVES, LEGGINGS AND SHORT 3/4 LEGGINGS

Products made of Polyfiber Cover: a fabric that provides thermal insulation without jeopardizing breathability and the elimination of moisture from the skin, so the skin is always left dry, thus preventing a feeling of cold and damp.

Easy to fold up and store in a pocket. Owing to their anatomic construction, they stay perfectly in place without creasing the joints.

# COMPRESSION

# BETTER BLOOD CIRCULATION MEANS BETTER PERFORMANCE

## PRINCIPLE OF OPERATION

With their special **variable density** weave, SIXS Compression products compress the muscle fibers in just the right points to **assist blood circulation** and therefore **tissue oxygenation**. It is like having muscles that are constantly massaged throughout their performance.

Like for all SIXS items, also in this case the yarns used are the result of painstaking technological research, are of top quality and foster breathability by helping eliminate sweat from the skin, thus preventing annoying irritations.

## WHEN TO USE THEM

The term "performance" does not refer just to racing efficiency. The compression garments offer several **benefits even before start**. They improve blood circulation, **which warms up the muscles faster**. Graduated compression on the limbs also encourages and increases the venous return to the heart and lymph nodes.

They are essential for **recovery** right after a performance, race or workout. In fact, it is natural that when circulation is stimulated inside the fibers, **muscle fiber recovery and repair time is shortened**.

There are **a number of benefits** also during the race. First of all, **they considerably reduce muscle damage** (micro-lesions of the fibers) by containing the muscle during activity. This also leads to less swelling after activity, and reduces the possibility of accident and tiredness.

Then inevitably the compression **increases performance**. By reducing the vibrations of the muscle (main source of fatigue), compression garments lead to greater resistance and strength, and a lower average heart rate.

## EVERY DAY

The benefits of the SIXS compression products can also be appreciated in **everyday activities**, such as during long periods of inactivity. When we are forced to stand still or remain seated for a long time, they protect against DVT (Deep Vein Thrombosis) by increasing blood circulation through venous return and reducing swelling in the ankles and legs.

## COMPRESSION CALF BAND AND RECOVERY SOCKS

Class 2" compression products.

With its special variable density weave, it compresses the muscle fibers in just the right points to assist blood circulation and therefore oxygenation of the tissues. This prevents lactic acid from accumulating in the calf muscles, which delays fatigue and drastically reduces recovery time.

It can be used before starting the activity to quicken the warmup, during the activity to enhance performance, or right afterward to reduce recovery time. The polyamide yarn used, thanks to its parallel construction, guarantees breathability and sweat wicking.

# SOCKS

---

## TO EACH HIS OWN

Socks are a fundamental element in completing sports clothing. Weather conditions, the sport played and appearance are all variables that make the choice of socks subjective and extremely important.

We are proud to be able to offer multi-sport products dedicated to cycling and motorcycling in our SOCKS range. Quality, design and attention to the finest detail ensure that once you have put on a pair of SIXS socks you will fall in love with them.

Fabrics and technologies specially designed to make these products the best on the market: seamless design with no pressure points. Moreover, the **BreathFit Socks** fabric does not retain perspiration and always leaves the skin dry, in this way preventing bacteria and irritations from proliferating.

COMFORT  
AT YOUR FEET

## BREATHFIT SOCKS

BreathFit fabric socks: thanks to the polypropylene fiber, the skin is always dry and wrapped so that unpleasant odors and annoying irritations due to an accumulation of perspiration and friction do not form.

# RESOLVWEAR

Washes, regenerates and sanitizes all types of technical sportswear and accessories in synthetic and natural fibres.

Designed to be effective on typical sports dirt at low temperatures (30°).

Removes unpleasant odours and gives a particular fragrance which remains for a long time with deodorant effect.

## AVAILABLE IN 2 SIZES:

- 1l bottle for 20/25 washes (for normal washing machine use)
- Portable "travel" 100ml bag for 2/3 washes, also convenient in hotels and accommodation facilities

## AVAILABLE IN 2 FRAGRANCES:

### • FRAGRANCE X

The famous original fragrance of SIXS garments, developed in collaboration specifically to renew the fragrance at each wash and enriched with molecules that keep the technical fibres soft and intact without using fabric softener and which reduce the formation of bad smells during wearing.

### • RESOLVWEAR FRAGRANCE ACTIVE

Intense fresh and menthol perfume, gives the composition an energizing tone, full of vitality.

## SUGGESTIONS FOR USE:

- To wash in the washing machine: use a specific program for sportswear at 30°. Depending on the degree of dirt choose a more energetic and longer program in the case of difficult dirt or a lighter and faster program in the case of light dirt
- Hand washing: dilute in lukewarm water, leave garments to soak for 30 minutes then rinse thoroughly
- In case of stubborn stains apply a few drops of product directly on stains before washing
- Dry in the shade and away from heat sources

## TECHNICAL SPECIFICATIONS:

- Specific product for synthetic fabrics and micro-fibres, maintains the fibres soft and protected
- Contains "Colour Saver": respects and maintains the original colours of the technical garments
- Do not add fabric softener (it clings to the fabrics and is therefore in contact with the skin and could cause skin reactions)

## FIT/SIZES

SIXS clothing is designed to fit the athlete's body snugly, like a second skin, enveloping and protecting it without applying too much pressure.

Owing to the extraordinary stretch of the Carbon Underwear® fabric and the outstanding fit, choosing the right size allows for a considerable tolerance. In any case, if you have never worn SIXS, we recommend that you stop in at an authorized reseller to ascertain your correct size.

SIXS products are technical items, and are not suitable for casual use.
